Lambda School
Certificate in Full-Stack Web
Development & Computer
Science

UC - Los Angeles
M.S. Chemistry

UC - Berkeley
B.S. Chemistry

Summary

- Full-Stack Developer with a passion for building interactive and engaging web apps.
- Proficient in both frontend and backend technologies.
- Always eager to master tomorrow's cutting-edge tech.
- Problem-solver with 5+ years experience teaching college-level chemistry.
- Prior work experience writing production quality React/Django apps.

Employment

Editate Inc
Remote Position
Software Engineer
Dec. '19 - June '22

- Contributed to continued development of Prompt - a college admission essay feedback platform that connected students applying to university with a network of essay specialists. Platform helped thousands of students yearly gain admittance to the worlds most highly competitive universities.
  - Implemented frontend features using both React and Vue
  - Extended business logic using Django REST framework
  - Built several internal tools via Retool to enable the support team to better serve customers and analyze company metrics
- Helped to create Wise(r)net, a college admissions student management platform, for Collegewise - an Editate business partner
  - Gained experience writing production-grade ReactJS on the frontend and Django REST on the backend
  - Participated in weekly stakeholder meetups where product features, user feedback, and roadmap where discussed
  - Landing page: https://collegewise.com/meet-wisernet
  - Demo: https://collegewise.com/meet-wisernet

Lambda School
Remote Position
Team Lead, Full-Stack Web Development
Aug. '18 - Dec. '18

- Full-stack curriculum teaching assistant to a small cohort of remote students.
- Led daily standup meetings to foster team cohesion.
- Provided weekly code review to assess material comprehension.
- Facilitated student progress with on-demand debugging assistance.

Santa Monica College
Santa Monica, CA
Adjunct Professor, Chemistry
June '14 - July '19

- Mentored and instructed 500+ young scientists in analytical chemistry.

Projects

ThaiSpicy Flashcards
Feb. '23 - Mar. '23

- Thai language flashcard app
- Tech: NextJS, TypeScript, Supabase, PostgreSQL, Playwright, Vitest

LearnLocker
May '19 - Present

- An open-source social learning platform for web developers built with a team of seven talented developers over fifteen weeks.
- LearnLocker helps developers level up their skillset by making it easy to find, save, and share the best tech learning resources.
- Featured on Lambda School's very first Project Showcase: (https://lambdaschool.com/lab-demos/hire-lambda)
- Tech: React/Redux, CSS-in-JS, Express, PostgreSQL, Socket.io, Cheerio, SendGrid

Personal Website
Jan. '23 - Feb. '23

- Technical lead to a team of five developers over an intensive week of development.
- RefugeeStories aims to connect refugees to each other and the world by providing a discreet and secure platform to share their stories.
- Tech: SvelteKit, TypeScript, MDX
